PROFILE

I'm a Frontend Developer with a passion for creating clean, responsive, and user-friendly web applications. I enjoy turning ideas and designs into interactive experiences using HTML, CSS, JavaScript, and React. I focus on writing clean code, optimizing performance, and making sure applications work smoothly across devices and browsers. I work well in teams, use tools like Git/GitHub, and love learning new technologies to keep improving the user experience.

EDUCATION

B.Tech in Computer Science and Engineering

2023 - 2027

Budge Budge Institute of Technology (BBIT), Kolkata

- Pre-Final year student

PROJECTS

- **FCFS CPU Scheduling Simulator:**

Developed a full-stack web application to simulate the First Come First Serve (FCFS) CPU scheduling algorithm.

- Frontend: Built with React.js, CSS, and Chart.js to provide interactive process input forms, tabular results, and Gantt chart visualization.
- Backend: Implemented with Node.js and Express, handling scheduling logic, average turnaround/ waiting time computation, and API endpoints.

- **Weather App** (HTML, CSS, JavaScript) : A responsive web app that fetches real-time weather data from an API and displays temperature, humidity, and other weather information. Improved usability with error handling for invalid user locations.

- **To-Do List App** (HTML, CSS, JavaScript): A responsive task management app with add, and delete features, using local storage for data persistence.
